

## **Project Mochi**

**Member Name** : Kenneth Ong Teck Jian

**Digipen Email** : t.ong@digipen.edu

**Main Responsibility:** Graphics programming and Content Writing

**Risk & Mitigations** : Not being able to come up with enough animated cutscenes in time. Mitigate by reducing animation and cutscenes if impossible. Quality > Quantity.

**Bug Reports** : A Bug: trouble using CSV file to incorporate to printing of graphics.

**Comments** : I am concern with how I can generate the graphics using .CSV files. Aka “King’s Crisis” uses a .csv file with x, y position data, character and colour. I am unsure how to I synchronise it into printing it out in C’s command prompt.

I have tried looking up, however most are pertaining to a specific compiler.

**Highlights** : Coming up with the design of the graphics UI (Health bar, Power Ups etc. ) and Start Menu.
